

# SOFTOPPER®

## ST Overhead Organizer

(Recommend for light weight items.)

Separate the buckle, place the strap over the crossbar then re-connect the buckle.  
Repeat this on all front and rear buckle straps.

Wrap the side straps around the folding frame assembly in the middle of the "X".  
Repeat on the other side of the vehicle.

Adjust all of the buckle straps to center the organizer between the cross bars.

**NOTE:**

Remove bulky or rigid items before folding / collapsing your Softopper.

Watch the straps to be sure they don't get pinched in the frame. **DO NOT** clip the Organizer to the straps or buckles on your Softopper canopy, you risk tearing or separating the seams.
